

DermaView

F a c i a l S k i n A n a l y z e r

**Portable, Interactive, Colorful
Skin Analysis**

- **Promote Skin Awareness**
- **Great For Sun Screen Promotion**
- **Determine Proper Skin Care Products**
- **Fast & Easy To Use**
- **Shows Results In Vivid Color**

A Look Inside The DermaView

The DermView Facial Skin Analyzer pinpoints problem areas from oily skin to dry skin to sun damaged skin.

Different colors indicate different conditions, allowing you to recommend the appropriate cosmetic care products.

The Ideal Tool For:

- Screening Companies
- Retail Beauty Salons
- Wellness Programs
- Anyone who needs to create interest and awareness of skin care

Promote Sun Screen Use and General Skin Care Awareness

The DermaView is the perfect tool to make people aware of their skin and why they need to take care of it.

Seeing is Believing -- this innovative instrument allows both the client and attendant to inspect the client's skin at the same time.

Demonstrate the Effectiveness of Sunscreen

Notice how the portion of the face with sunscreen blocks out the light from the DermaView. Sunscreen has the same effect on sunlight.

Easy to Use - Easy to Understand

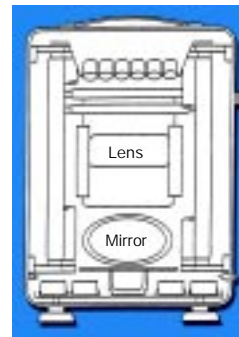

Sitting comfortably, the client places his/her head under the hood. The DermaView then clearly identifies problem skin areas.

Both will immediately see where skin conditions exist.

With the curtain retracted, the DermaView is compact, portable, and easily stored

Features include:

- 2X Magnification
- Viewing Mirror
- Cooling Fan
- Long Lasting Bulbs

Supplies include pads of final analysis forms that allow you to document your analysis, make recommendations, and help your clients understand what they have seen.
